**PING ERROR TEST**

Explain proper scenario for following ping errors ?

Destination host unreachable

- Destination host unreachable means there is no destination can't be reached. It can happen due to no route, destination device down, next hop connectivity problem

Request timed out

Request timed out means Request have reached the destination, but the replay was not received. The reason could be firewall block, wrong default gateway, missing return route, network connectivity issue

Reply from some ip destination host unreachable

~~It~~ means destination device cannot reach from the network path. If the

- \* Reply from some ip destination host unreachable means that ip is device / router that is reporting that it cannot reach the destination because there is no route in router or device

TTL expired

TTL → Time to Live

TTL is a value that limits how many router a packet can pass through. Each router decreases the TTL by 1. When the TTL reach 0, the packet is dropped

wind: 128  
Linux: 64  
Cisco: 255

**The error: TTL expired**

- 1) Destination host unreachable na stop ping panna
- \* routing table route ila na varum on
  - \* Destination device off la iruntha varum on
  - \* Route irunthalam next device mac reachable ila irthalam Destination host unreachable varalam

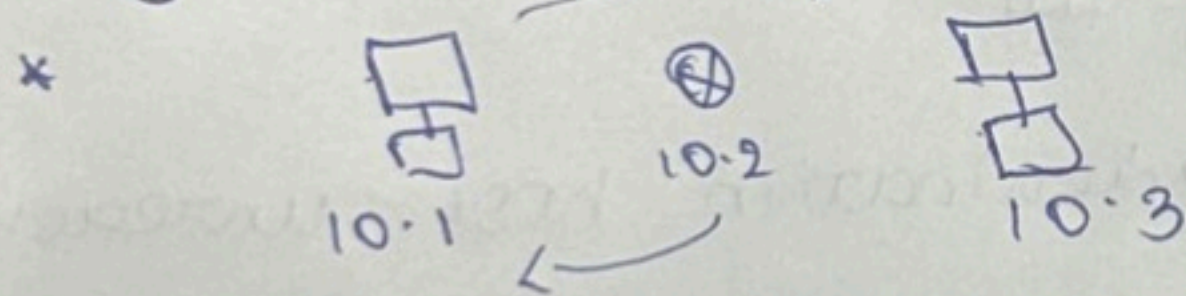

X ————— X

2) Request timed out na pc to pc ping panura apo

- \* Destination firewall Temp block panalam
- \* Network path issue irikalam
- \* Routing / default gateway problem irikum

X ————— X

3) Replay from some IP destination host unreachable

- \* Ipa na 10.1 to 10.3 ping panna source ip 10.1 next path ku move agum atha next device do router 10.2 la 10.3 ku route iruntha 10.3 pc kum pogum on route ilana 10.2 la irunthu intha error message varum.

X ————— X

4) Ipa router ip 10.10 2nd router ip 10.20 data 10.10 la irunthu 10.20 ku pogum pothu 10.10 next hop correct irikum but 10.20 la route Thapa iruntha like route 10.10 nu iruntha loop agum each router Thandum pothu -1 decrease agum last la ttl expired nu error varum
