PHYSICAL CONNECTION TEST

1, Types of mediums ?

* Medium is a physical or wireless path used to store or transfer data

Types:

- Radio frequency - wireless - mobile phones
- Electrical signal - wired - copper wire - UTP cable
- Light signal - fiber optical cable

2, Write down switch 8-pins ?

- 1 +R
- 2 -R
- 3 +R
- 4 +V
- 5 -V
- 6 -R
- 7 *
- 8 *

	+T -T		+R -R	
PC	1	2	3	6
Router	1	2	3	6
Switch	3	6	1	2

3, Connect utp cable between two devices

Router

PC

Cross cable method

4, Explain AUTO MDIX ?

* Auto MDIX is a feature of Network Interface Card (NIC) it is automatically detects straight cable or cross cable connected and adjusts their "Transmit and Receiver pins" automatically. Because, we don't need to worry about the correct cable type. Older device without Auto MDIX is required the correct cable for communication.

5, Explain POE injector ?

→ If your company has as a non-POE Switch but needs to connect POE camera. buying a POE switch can be expensive. instead you can buy POE injector. That injector provides both power and data to camera. This is more cost effective solution than buying a new switch.

6, Explain POE switch ?

* Power over Ethernet (POE). A (POE) Switch That supplies both electrical power and data to POE enabled device through Ethernet cable.

7, Explain types of NIC & function ?

* There are two types of NIC card

* Network Interface card

* Types : * wired Ex: Laptop

* wireless Ex: mobile

* It contains IP and mac address

* It contains in Ethernet port

Function:

= It use to convert Binary to Electrical
Electrical to Binary
